## ORIENT PEAR

### *Blight Resistant*

The outstanding Pear for the South, Introduced by University of Tennessee Experiment Station. Fruit breeders have been trying for 100 years to develop blight-free pears of good quality that can be grown in the Southern States. This we believe is the best answer that has been found to date. Foliage dark green, very attractive with leaves remaining on the tree until late. Vigorous grower, fruit good quality, mellow, white fleshed. It averages often 3¼ inches in diameter.
